

New Year means Renewed Focus for Mundial Consulting

Independent IT Consultancy, Mundial Consulting has taken new measures to ensure ongoing investment in its clients, with the re-launch of its website; a 2007 marketing campaign; and the renewed communication of its company vision.

The updated www.mundialconsulting.co.uk now includes downloadable case studies and company presentations as well as event news and a quarterly e-newsletter; addressing trends, products and services affecting the market. Designed to meet the needs of current and prospective clients, the new website offers both industry insight and a proven track record in delivering trusted and straightforward IT consultancy.

The company vision: *'enabling free thinking solutions'* is achieved in close partnership with clients; by understanding their objectives and offering tailored, best value, and shared risk solutions to their individual needs.

Mundial Consulting has been involved in a number of high profile deployments including VOiP and CTI enabled contact centres as well as a number of strategic client referenced procurement projects. Clients include London Borough of Hounslow, Connexions Advisory Service and Time Manager International.

Mundial Consulting was founded in 2003 by Nick Henley as an independent consultancy for both the public and private sector. The objective is to provide advice on best value procurement, project management and commercial support activities. Much of their work during this time has been dedicated to developing programmes that raise awareness of the link between the human factors associated with ICT projects and ultimately, the successful impact these can have.
